Explanation

My design choices :- This design makes tax harvesting feel easy, helpful, and stress-free , so even beginners can understand how it works and start saving on taxes right away. It is user-friendly and easy to navigate.

Tax harvesting :- Feels like a friendly guide . It shows you where to save tax, when to take action and how to do it with just a tap.
You don't need to be a tax expert, the app does the all work you just follow the steps.

Visually appealing :- It uses colors, icons, charts, and clean layouts to make complex tax information look simple, clear, and friendly.
It feels more like using a smart, modern app and not like reading a bank document.
example: Red → Loss,Green → Profit.

Easy to understand :- It uses icons and very easy to understand because app contains explanation of tax harvesting , how does tax harvesting works and what are some strategies of tax harvesting.

→ App Logo.

→ These icons are interactive.

Buttons are interactive → Portfolio. Login Signin
